Activity 1 — Mid-Project Critique Circle

Module: Project Implementation — Capstone · **Band:** Primary · **Duration:** 30 min

Purpose

Reinforce the day-by-day concepts of Project Implementation — Capstone through a hands-on activity. Aligned with NEP 2020 §4.23 (experiential learning).

Materials

student project plans, sticky notes

What students do

Pairs swap project plans, read in 5 minutes, then offer one strength (one sticky note) and one concern (another sticky note). Pairs rotate twice. Refine plan based on feedback.

Step-by-step

1. **Setup (5 min)** — gather materials; explain the task.
2. **Working phase (20 min)** — students work individually or in pairs.
3. **Share (5 min)** — selected students share their results with the class.

Differentiation

- **Extension:** ask advanced students to do an additional iteration or analysis.
- **Support:** pair students who need scaffolds; offer partial templates.

Assessment

This activity is **formative**. The teacher observes participation, accuracy, and reflection quality. No grade is assigned.

Safety

- General safety briefing before any materials are handled.

- If herbs, plants, or food are involved: kitchen-amount only, no ingestion of unknown preparations.
- Outdoor activities: stay in the designated area; supervised by the teacher.

Project Brief

Project Brief — Capstone Project (Student Choice)

Module: Project Implementation — Capstone · **Band:** Primary

What you will do

Choose one of the 10-option project menu (see README.md) or pitch your own. Deliverables: 1-page plan, daily journal, final artefact, ~500-word reflection (Senior; ~300 for Middle; oral share for Primary), 5-minute presentation. Safety: NO cow-urine ingestion for any pañcagavya project — pivot to fermented-foods comparative study instead.

Why

This project asks you to apply concepts from this module to your own life or a real situation. It is graded on the rubric in `rubric.md`.

Deliverables

- **One-page project plan** (Day 2 of the module): problem, sources, deliverable, timeline.
- **Daily journal entries** (one per day, starting Day 6): what you did, what worked, what didn't.
- **Final artefact** (a drawing / made object).
- **Written reflection** (oral share): what you learned, what surprised you, what you're still uncertain about.
- **Presentation** (3-minute share with the class).

Timeline

- **Day 1–2:** scope and plan.
- **Day 3–4:** research.
- **Day 5:** mid-project critique.
- **Day 6–7:** build / make.
- **Day 8:** document.
- **Day 9:** rehearse.
- **Day 10:** share day.

Sources

You must cite at least 1 sources. Use the form: *Author, Title, year*. (See `../sources.md` for examples.)

Safety

- Any project involving plants / food / outdoor work must be supervised.
- **No herbal medicine recommendations.** Modules 10 and 4 give awareness; therapeutic decisions belong to qualified practitioners.
- **Capstone safety:** if you choose a pañcagavya project, you **MUST** use the fermented-foods comparative-study substitution — cow-urine ingestion is **NOT** allowed.

Grading

See `rubric.md`. The project is worth the same weight as the summative quiz.
