IKS Curriculum

## Table of Contents

### Overview

### Project Implementation — Capstone

**Band:** Primary (Grades 3–5) · **Sessions:** 10 × 30 min · **Sanskrit:** Anvayana — Synthesis

### Overview

The capstone module of the curriculum. Students choose from a menu of applied projects (or design their own) that draw on concepts from Modules 1–14. They scope, research, design, build, document, and present. Process discipline — daily journal, source citations, honest reflection — is part of the assessment.

### NEP 2020 alignment

- §4.6 — Integration of Indian Knowledge Systems
- §4.23 — Experiential / project-based learning
- §11.8 — Holistic, multidisciplinary

### Key terms (this module)

- *anvayana* — integration / following-through; capstone synthesis
- *pañcagavya* — five-cow-product preparation (substituted with fermented-foods study for school safety)
- *siddhānta* — concluded principle or doctrine

### Prerequisites

Module 2 (Panchabhūta) is recommended before this module. Modules 5 (Bindu Paddhati / dot addition) and 7 (×11 Multiplication) are useful prerequisites for Module 9 and 11.

### Materials needed (across 10 days)

- Notebook + pencils per student
- Whiteboard / chart paper
- (See `lesson-plan.md` for per-day material lists)

## 10-day map

### Pacing notes

- Primary sessions are 30 min. Adjust if your block is different.
- Days 5 and 9 are buffer days — use to reinforce weaker concepts or extend stronger ones.
- The summative project (see `assessments/project-brief.md`) runs in parallel from Day 6 onward.

### Differentiation

- **For advanced students:** see `teacher-notes.md` for extension prompts.
- **For students needing more support:** simplify activities, do more pair-work, allow oral instead of written responses.

## Teacher Notes

## Teacher Notes — Project Implementation — Capstone (Primary)

### Common student misconceptions

- *“This is religious, not scientific.”* — Frame the tradition as historical observation. Pañcabhūta-like classifications of matter exist in many cultures. Indian astronomy and math are documented, peer-reviewed historical fields.
- *“The Sanskrit terms are just jargon.”* — Insist on the triple format (Sanskrit / IAST / meaning) once, then use the Sanskrit alone. The terms are precise; the discipline of using them properly is itself a learning outcome.
- *“If it’s traditional, it must work.”* — Distinguish empirical claims (testable) from ethical/aesthetic frames (which need separate justification). Encourage students to ask “how would I test this?”.

### Differentiation strategies

- **Extension for advanced students:** offer one optional “deeper read” per day — usually a primary source or modern paper.
- **Support for students needing scaffolds:** more pair-work, allow oral responses, provide partial outlines for writing prompts.
- **Multilingual classrooms:** Sanskrit terms are universal; vernacular equivalents (Hindi, Tamil, Telugu, Bengali, Marathi etc.) should be welcomed.

## Safety

- Any activity involving food, plants, fire, or outdoor work needs explicit safety briefing.
- See the relevant day file for activity-specific safety notes.

## Honest framing

- Where modern science clearly extends or revises traditional claims, say so.
- Where the tradition's framing is best understood as ethical/aesthetic, present it as such (not as competing science).
- Where attribution is debated (e.g., the “Vedic” status of Tirthaji's mathematics), present the debate honestly.

## End-of-module reflection (for teachers)

- Which concepts landed well? Which didn't?
- Which students grew most? Which need a different approach next module?
- Add notes to `teacher-notes.md` for the next teacher who uses this pack.

## Sources

### Sources — Project Implementation — Capstone (Primary)

#### Primary and secondary sources

- All Modules 1–14 of this curriculum
- Project-Based Learning literature (Buck Institute, Edutopia)
- NCERT NEP 2020 §4.23 — experiential learning

#### A note on citation discipline

Per the curriculum's style guide, citations must be verifiable. If a verse number, page, or attribution cannot be confirmed, the source is paraphrased without invented attribution. Where direct quotes appear in Primary-band day files, the source is identified in IAST + edition.

#### For deeper reading

- The shared glossary at `curriculum/_shared/glossary.md` contains the IAST + meaning for every Sanskrit term used.
- Other modules in this curriculum that connect: see the module README's “Prerequisites” section.

## Activity 1 — Mid-Project Critique Circle

**Module:** Project Implementation — Capstone · **Band:** Primary · **Duration:** 30 min

## Purpose

Reinforce the day-by-day concepts of Project Implementation — Capstone through a hands-on activity. Aligned with NEP 2020 §4.23 (experiential learning).

## Materials

student project plans, sticky notes

## What students do

Pairs swap project plans, read in 5 minutes, then offer one strength (one sticky note) and one concern (another sticky note). Pairs rotate twice. Refine plan based on feedback.

## Step-by-step

1. **Setup (5 min)** — gather materials; explain the task.
2. **Working phase (20 min)** — students work individually or in pairs.
3. **Share (5 min)** — selected students share their results with the class.

## Differentiation

- **Extension:** ask advanced students to do an additional iteration or analysis.
- **Support:** pair students who need scaffolds; offer partial templates.

## Assessment

This activity is **formative**. The teacher observes participation, accuracy, and reflection quality. No grade is assigned.

## Safety

- General safety briefing before any materials are handled.

- Outdoor activities: stay in the designated area; supervised by the teacher.

## Project Brief

### Project Brief — Capstone Project (Student Choice)

**Module:** Project Implementation — Capstone · **Band:** Primary

## What you will do

Choose one of the 10-option project menu (see README.md) or pitch your own. Deliverables: 1-page plan, daily journal, final artefact, ~500-word reflection (Senior; ~300 for Middle; oral

share for Primary), 5-minute presentation. Safety: NO cow-urine ingestion for any pañcagavya project — pivot to fermented-foods comparative study instead.

## Why

This project asks you to apply concepts from this module to your own life or a real situation. It is graded on the rubric in `rubric.md`.

## Deliverables

- **One-page project plan** (Day 2 of the module): problem, sources, deliverable, timeline.
- **Daily journal entries** (one per day, starting Day 6): what you did, what worked, what didn't.
- **Final artefact** (a drawing / made object).
- **Written reflection** (oral share): what you learned, what surprised you, what you're still uncertain about.
- **Presentation** (3-minute share with the class).

## Timeline

- **Day 1–2:** scope and plan.
- **Day 3–4:** research.
- **Day 5:** mid-project critique.
- **Day 6–7:** build / make.
- **Day 8:** document.
- **Day 9:** rehearse.
- **Day 10:** share day.

## Sources

You must cite at least 1 sources. Use the form: *Author, Title, year*. (See `../sources.md` for examples.)

## Safety

- Any project involving plants / food / outdoor work must be supervised.
- **No herbal medicine recommendations.** Modules 10 and 4 give awareness; therapeutic decisions belong to qualified practitioners.
- **Capstone safety:** if you choose a pañcagavya project, you **MUST** use the fermented-foods comparative-study substitution — cow-urine ingestion is **NOT** allowed.

## Grading

See `rubric.md`. The project is worth the same weight as the summative quiz.

# Rubric

## Assessment Rubric — Project Implementation — Capstone (Primary)

This rubric applies to the project (see `project-brief.md`) and may also inform the summative quiz.

### Criteria

- **Knows the new word(s)** — 🌟 Strong understanding / 🌱 Growing / ☁️ Needs more practice
- **Joined in activities** — 🌟 Strong understanding / 🌱 Growing / ☁️ Needs more practice
- **Asked good questions** — 🌟 Strong understanding / 🌱 Growing / ☁️ Needs more practice
- **Drew / made something** — 🌟 Strong understanding / 🌱 Growing / ☁️ Needs more practice

### How the teacher uses this rubric

1. After the project share, score each student on each criterion.
2. Convert to a band (4 = Exceeding, 3 = Meeting, etc.) for the report card.
3. Share at least one strength and one area for growth with each student.

### Self-assessment (Senior students)

Senior students complete a parallel self-assessment using the same rubric before the teacher's assessment. The teacher and student then meet to compare.
