

Day 1 — The Hook — What Is the Trick?

Module: $\times 11$ Multiplication — Ekādhikena Pūrveṇa (Primary) · **Time:** 30 min

Goal

Compute 23×11 , 35×11 mentally using the split-and-sum method.

Materials

- Notebook, pencils, drawing paper
- (See lesson-plan.md for any day-specific materials)

The flow

Settle + chant (3 min)

Daily chant or breathing exercise.

Story recall (4 min)

Briefly recall yesterday's lesson by asking: “*What’s one thing you remember from yesterday?*”

Today’s idea (10 min)

- *Ekādhikena Pūrveṇa* (IAST: Ekādhikena Pūrveṇa; lit. ““by one more than the previous” — sūtra 1 in Tirthajī”)
- Watch this trick! $23 \times 11 = ?$

Show on the board: “2 _ 3” with a gap. Whisper: “What’s $2 + 3$?” (Wait for “5”.) Fill in: “2 5 3 → 253!”

Each child practices: $12 \times 11 = 132$. $34 \times 11 = 374$. $25 \times 11 = 275$. Try 5 more.

Magic chant: “*Split, add, put in middle!*” (Children chant 3 times.)

Activity (8 min)

A simplified version of *Mental Math Sprint Cards* (see activities/). Draw, sing, or act it out.

Wrap-up (3 min)

Each child shares one word that describes today.

Homework

(See homework.md.)

Teacher notes

- Citations belong in teacher notes only, not in student-facing material at this band.
- Keep new Sanskrit terms to one per lesson, repeated several times.
- If energy is low, swap the activity for free drawing.
