

Day 2 — The Carry Case

Module: $\times 11$ Multiplication — Ekādhikena Pūrveṇa (Primary) · **Time:** 30 min

Goal

Compute 87×11 , 65×11 correctly using the carry rule.

Materials

- Notebook, pencils, drawing paper
- (See lesson-plan.md for any day-specific materials)

The flow

Settle + chant (3 min)

Daily chant or breathing exercise.

Story recall (4 min)

Briefly recall yesterday's lesson by asking: “*What's one thing you remember from yesterday?*”

Today's idea (10 min)

- *sūtra* (IAST: sūtra; lit. “aphorism / formula”)
- What if the middle sum is too big? Like 87×11 .

Show: “8 _ 7” with gap. $8 + 7 = 15$. Whisper: “15 is two digits! Keep the 5, carry the 1.”

Result: $8 + 1 = 9$, then 5, then 7 → **957**.

Practice: $67 \times 11 = 7\ 3\ 7$. $95 \times 11 = 1\ 0\ 4\ 5$. “*Carry the tens, keep the ones!*” (Chant.)

Activity (8 min)

A simplified version of *Mental Math Sprint Cards* (see activities/). Draw, sing, or act it out.

Wrap-up (3 min)

Each child shares one word that describes today.

Homework

(See homework.md.)

Teacher notes

- Citations belong in teacher notes only, not in student-facing material at this band.
- Keep new Sanskrit terms to one per lesson, repeated several times.

- If energy is low, swap the activity for free drawing.
