

## Day 4 — 3-Digit $\times$ 11

**Module:**  $\times 11$  Multiplication — Ekādhikena Pūrveṇa (Primary) · **Time:** 30 min

### Goal

Compute  $234 \times 11 = 2\_5\_7\_4$  using the extended split method.

### Materials

- Notebook, pencils, drawing paper
- (See lesson-plan.md for any day-specific materials)

### The flow

#### Settle + chant (3 min)

Daily chant or breathing exercise.

#### Story recall (4 min)

Briefly recall yesterday's lesson by asking: “*What's one thing you remember from yesterday?*”

#### Today's idea (10 min)

- *Ekādhikena Pūrveṇa* (IAST: Ekādhikena Pūrveṇa; lit. ““by one more than the previous” — sūtra 1 in Tirthajī”)
- For 3-digit numbers: split with TWO gaps!

$234 \times 11 = ?$  - Write “2 \_ \_ 4” with two gaps. - Fill:  $2+3 = 5$  (first gap),  $3+4 = 7$  (second gap). - Answer: **2574**.

Practice:  $123 \times 11 = 1 (1+2) (2+3) 3 = 1353$ .  $456 \times 11 = 5016$  (with carries — hard).

Most children stick to no-carry cases this day.

#### Activity (8 min)

A simplified version of *Mental Math Sprint Cards* (see [activities/](#)). Draw, sing, or act it out.

#### Wrap-up (3 min)

Each child shares one word that describes today.

### Homework

(See [homework.md](#).)

## Teacher notes

- Citations belong in teacher notes only, not in student-facing material at this band.
- Keep new Sanskrit terms to one per lesson, repeated several times.
- If energy is low, swap the activity for free drawing.
