

Day 1 — The Sun’s Yearly Path

Module: Movement of the Sun (Primary) · **Time:** 30 min

Goal

Observe that sunrise direction changes; introduce the ecliptic.

Materials

- Notebook, pencils, drawing paper
- (See lesson-plan.md for any day-specific materials)

The flow

Settle + chant (3 min)

Daily chant or breathing exercise.

Story recall (4 min)

Briefly recall yesterday’s lesson by asking: “*What’s one thing you remember from yesterday?*”

Today’s idea (10 min)

- *Sūrya* (IAST: Sūrya; lit. “the Sun”)
- The Sun rises in different places through the year!

Stand at a window facing east. Mark where the Sun comes up TODAY. (Just outside the window — point with arms.)

In summer, the Sun rises a bit more to the LEFT. In winter, more to the RIGHT (in northern places).

Children draw a window with the Sun in 3 spots: summer (left), middle (spring/autumn), winter (right). One drawing.

Activity (8 min)

A simplified version of *Sunrise Direction Tracking* (see [activities/](#)). Draw, sing, or act it out.

Wrap-up (3 min)

Each child shares one word that describes today.

Homework

(See [homework.md](#).)

Teacher notes

- Citations belong in teacher notes only, not in student-facing material at this band.
- Keep new Sanskrit terms to one per lesson, repeated several times.
- If energy is low, swap the activity for free drawing.
