

Day 3 — Uttarāyaṇa and Dakṣiṇāyana

Module: Movement of the Sun (Primary) · **Time:** 30 min

Goal

Identify the dates and direction of each.

Materials

- Notebook, pencils, drawing paper
- (See lesson-plan.md for any day-specific materials)

The flow

Settle + chant (3 min)

Daily chant or breathing exercise.

Story recall (4 min)

Briefly recall yesterday's lesson by asking: “*What’s one thing you remember from yesterday?*”

Today’s idea (10 min)

- *Dakṣiṇāyana* (IAST: Dakṣiṇāyana; lit. “southward solar course (June 21 – Dec 21)”)
- The Sun has two journeys each year:
 - **Uttarāyaṇa** (“Going North”): Dec to June — days get longer in the north.
 - **Dakṣiṇāyana** (“Going South”): June to Dec — days get shorter in the north.

Children stand with hands held high. Drift to the right (north). “*That’s Uttarāyaṇa!*” Drift to the left (south). “*That’s Dakṣiṇāyana!*”

Each child draws an arrow on a calendar showing today’s direction.

Activity (8 min)

A simplified version of *Sunrise Direction Tracking* (see [activities/](#)). Draw, sing, or act it out.

Wrap-up (3 min)

Each child shares one word that describes today.

Homework

(See [homework.md](#).)

Teacher notes

- Citations belong in teacher notes only, not in student-facing material at this band.
- Keep new Sanskrit terms to one per lesson, repeated several times.
- If energy is low, swap the activity for free drawing.
