

Day 4 — Equinoxes — Viṣuva

Module: Movement of the Sun (Primary) · **Time:** 30 min

Goal

Identify spring and autumn equinoxes (day = night).

Materials

- Notebook, pencils, drawing paper
- (See lesson-plan.md for any day-specific materials)

The flow

Settle + chant (3 min)

Daily chant or breathing exercise.

Story recall (4 min)

Briefly recall yesterday's lesson by asking: *"What's one thing you remember from yesterday?"*

Today's idea (10 min)

- *saṁkrānti* (IAST: saṁkrānti; lit. "Sun's crossing from one Rāśi to the next")
- Two special days each year: day and night are EXACTLY the same length!

These are called **equinoxes** (or *viṣuva*). - **Spring equinox** (around March 21): days getting longer. - **Autumn equinox** (around September 22): days getting shorter.

Children stand still with arms balanced equally. *"Day equals night!"*

Draw two suns on a year-circle, one in March, one in September. Label "equinox."

Activity (8 min)

A simplified version of *Sunrise Direction Tracking* (see [activities/](#)). Draw, sing, or act it out.

Wrap-up (3 min)

Each child shares one word that describes today.

Homework

(See [homework.md](#).)

Teacher notes

- Citations belong in teacher notes only, not in student-facing material at this band.
- Keep new Sanskrit terms to one per lesson, repeated several times.
- If energy is low, swap the activity for free drawing.
