

Day 8 — Precession of the Equinoxes

Module: Movement of the Sun (Primary) · **Time:** 30 min

Goal

Explain why Indian and Western zodiac dates differ today.

Materials

- Notebook, pencils, drawing paper
- (See lesson-plan.md for any day-specific materials)

The flow

Settle + chant (3 min)

Daily chant or breathing exercise.

Story recall (4 min)

Briefly recall yesterday's lesson by asking: *"What's one thing you remember from yesterday?"*

Today's idea (10 min)

- *Sūrya* (IAST: *Sūrya*; lit. "the Sun")
- The Earth wobbles slowly, like a spinning top.
- One wobble takes about 26,000 years!

Show a spinning top toy. Let it slow down — it wobbles. *"Earth does this too, just SUPER slowly."*

Children draw Earth tilted, with a curved arrow showing the wobble. *"Astronomers from long ago noticed this!"*

Activity (8 min)

A simplified version of *Sunrise Direction Tracking* (see [activities/](#)). Draw, sing, or act it out.

Wrap-up (3 min)

Each child shares one word that describes today.

Homework

(See [homework.md](#).)

Teacher notes

- Citations belong in teacher notes only, not in student-facing material at this band.
- Keep new Sanskrit terms to one per lesson, repeated several times.
- If energy is low, swap the activity for free drawing.
