

Day 8 — Climate Change — The Crisis

Module: Indic Ecology — Vasudhaiva Kuṭumbakam (Primary) · **Time:** 30 min

Goal

Summarise key IPCC findings; what is changing and why.

Materials

- Notebook, pencils, drawing paper
- (See lesson-plan.md for any day-specific materials)

The flow

Settle + chant (3 min)

Daily chant or breathing exercise.

Story recall (4 min)

Briefly recall yesterday's lesson by asking: *"What's one thing you remember from yesterday?"*

Today's idea (10 min)

- *ahimsā* (IAST: *ahimsā*; lit. "non-violence; extended to non-human life")
- The Earth is getting warmer because we burn too much fuel.
- Ice is melting. Some animals lose their homes. Some farms have trouble.

Show simple graphics: a thermometer going up, an ice cube melting, a tree being planted.

"What can WE do?" Children brainstorm: walk instead of drive, plant trees, save water, don't waste food. Pick one to try this week.

Activity (8 min)

A simplified version of *Sacred Grove (or Local Ecology) Mapping* (see [activities/](#)). Draw, sing, or act it out.

Wrap-up (3 min)

Each child shares one word that describes today.

Homework

(See [homework.md](#).)

Teacher notes

- Citations belong in teacher notes only, not in student-facing material at this band.
- Keep new Sanskrit terms to one per lesson, repeated several times.
- If energy is low, swap the activity for free drawing.
