

Day 1 — Discover the 3×3

Module: Magic Squares — Bhadragaṇita (Primary) · **Time:** 30 min

Goal

Build the unique 3×3 magic square with 1–9 by trial.

Materials

- Notebook, pencils, drawing paper
- (See lesson-plan.md for any day-specific materials)

The flow

Settle + chant (3 min)

Daily chant or breathing exercise.

Story recall (4 min)

Briefly recall yesterday’s lesson by asking: “*What’s one thing you remember from yesterday?*”

Today’s idea (10 min)

- *bhadra-gaṇita* (IAST: bhadra-gaṇita; lit. ““auspicious arithmetic” — the Indian term for magic squares”)
- BIG puzzle! Put the numbers 1 to 9 in a 3×3 grid. Each row, column, and diagonal should add to the SAME number!

Children work in pairs. Try, fail, try again.

Hint after 5 min: “*5 always goes in the middle.*”

The answer: 2-7-6 / 9-5-1 / 4-3-8. All rows = 15! All columns = 15! Even diagonals = 15! MAGIC!

Activity (8 min)

A simplified version of *Class 3×3 Magic-Square Tournament* (see [activities/](#)). Draw, sing, or act it out.

Wrap-up (3 min)

Each child shares one word that describes today.

Homework

(See [homework.md](#).)

Teacher notes

- Citations belong in teacher notes only, not in student-facing material at this band.
- Keep new Sanskrit terms to one per lesson, repeated several times.
- If energy is low, swap the activity for free drawing.
