

Day 5 — Practice — 5×5 and 7×7

Module: Magic Squares — Bhadragaṇita (Primary) · **Time:** 30 min

Goal

Use the method on multiple odd-order squares.

Materials

- Notebook, pencils, drawing paper
- (See lesson-plan.md for any day-specific materials)

The flow

Settle + chant (3 min)

Daily chant or breathing exercise.

Story recall (4 min)

Briefly recall yesterday's lesson by asking: "*What's one thing you remember from yesterday?*"

Today's idea (10 min)

- *siddhāṅka* (*modern coinage*) (IAST: *siddhāṅka* (*modern coinage*); lit. "the common sum of all rows/columns/diagonals")
- Today: try a BIGGER magic square — 5×5 !

Place 1 in the top-middle. Step up-right. Wrap when needed. Keep going to 25.

It looks confusing at first, but the rule is the same. The magic number for 5×5 is **65** (all rows, columns, diagonals add to 65).

Children try with the teacher's help. Most won't finish — that's OK! Just enjoy the start.

Activity (8 min)

A simplified version of *Class 3×3 Magic-Square Tournament* (see [activities/](#)). Draw, sing, or act it out.

Wrap-up (3 min)

Each child shares one word that describes today.

Homework

(See [homework.md](#).)

Teacher notes

- Citations belong in teacher notes only, not in student-facing material at this band.
- Keep new Sanskrit terms to one per lesson, repeated several times.
- If energy is low, swap the activity for free drawing.
