

Day 6 — 4×4 and the Khajuraho Square

Module: Magic Squares — Bhadrageṇita (Primary) · **Time:** 30 min

Goal

Examine the Khajuraho inscription and its panel-magic property.

Materials

- Notebook, pencils, drawing paper
- (See lesson-plan.md for any day-specific materials)

The flow

Settle + chant (3 min)

Daily chant or breathing exercise.

Story recall (4 min)

Briefly recall yesterday's lesson by asking: “*What's one thing you remember from yesterday?*”

Today's idea (10 min)

- *kothumi vidhi* (IAST: kothumi vidhi; lit. “Nārāyaṇa's algorithm for odd-order squares”)
- 4×4 magic squares are also amazing! In INDIA, there's one carved on a temple wall — the Khajuraho square. About 1000 years old!

Show the picture. “*All rows = 34, all columns = 34. Even small 2x2 boxes inside = 34!*”

Children draw a 4×4 grid and copy the numbers. They check: do the rows add to 34? Try one!

Activity (8 min)

A simplified version of *Class 3×3 Magic-Square Tournament* (see activities/). Draw, sing, or act it out.

Wrap-up (3 min)

Each child shares one word that describes today.

Homework

(See homework.md.)

Teacher notes

- Citations belong in teacher notes only, not in student-facing material at this band.
- Keep new Sanskrit terms to one per lesson, repeated several times.

- If energy is low, swap the activity for free drawing.
