

# Day 8 — Speed Day

**Module:** Subtraction — Nikhilam (All from 9) · **Band:** Senior · **Time:** 45 min

## Learning objective

By the end of this lesson, students will: complete a 30-problem mental subtraction sprint.

## Materials

- Whiteboard / chart paper
- Notebook, pen per student
- (See lesson-plan.md for any day-specific materials)

## Vocabulary introduced today

- *pratiyogi* (*modern coinage*) (IAST: pratiyogi (*modern coinage*); lit. “the number that adds to a base”)

## Lesson flow

### Warm-up (5 min)

- Daily check-in: one-sentence response to “*What’s one thing you remember about yesterday’s lesson?*”
- Hook: introduce a phenomenon or question that motivates today’s concept.

### Core (20 min)

1. **30-problem mental sprint.** Mix:
  - Pure Nikhilam (subtract from 10, 100, 1000, 10000) — 15 problems
  - Add-the-complement (general subtractions) — 10 problems
  - Edge cases (trailing zeros, single-digit) — 5 problems
2. **5-minute timer.** Silence. Pen on paper.
3. **Pair-mark.** Swap and check.
4. **Distribution analysis.** “*Where did errors cluster?*” Most likely: edge cases (trailing zeros), large complements (10000 case).
5. **Personal best.** Record score; set target for next sprint.

### Activity (15 min)

A scaled version of *Complement Flashcards* (see [activities/](#)). Today’s slice: focus on the part of the activity that reinforces Speed Day.

### Wrap-up (5 min)

- One-sentence exit ticket: “*What’s one thing you learned today?*”
- Preview tomorrow.

### Homework

(See `homework.md` for today’s task.)

### Differentiation

- **Extension:** offer one open question or extra problem for fast finishers.
- **Support:** pair students who need scaffolds; offer partial outlines.

### Teacher notes

- Citations: at least one quoted verse with citation per module. Day 1 already includes one if applicable; you may add more.
- Connect to prior modules where natural (especially Module 2 *pañcabhūta*).
